

## 22nd Street Improvements - Interstate 10 to Tucson Boulevard PROJECT FACT SHEET

The 22nd Street Corridor Improvements from Interstate 10 (I-10) to Tucson Boulevard will add one new travel lane in each direction, a grade separation at the railroad tracks, and intersection improvements along 22nd Street to promote mobility, capacity, and safety. It will create new roadway and streetscape designs, guide future land-use decisions, enhance environmental and economic sustainability, and improve mobility for vehicles, transit, bicycles, and pedestrians. Special consideration will also be given to ADA accessibility.

The study and design of 22nd Street, from I-10 to Tucson Boulevard, is occurring in two sections:

- 1) The planning for the Kino Parkway/22nd Street Interchange and widening of 22nd Street, from Kino Parkway east to Tucson Boulevard, has been underway for more than four years. The City has established a Citizen Advisory Committee representing neighborhoods, businesses, and property owners that meets regularly for this planning and design effort.
- 2) The planning for the 22nd Street Corridor, from I-10 to Kino Parkway, has been underway for more than two years. A 17-member Citizen Oversight Committee was established by the City to guide the planning and design effort, and has met regularly since November 2008. The construction is currently planned for the second and third periods of the RTA Plan (2012-2021).

This is a project of the Regional Transportation Authority. The voter-approved, \$2.1 billion RTA plan will be implemented through 2026. Details about the full plan are available at [www.RTAmobility.com](http://www.RTAmobility.com). The Regional Transportation Authority has a nine-member board with representatives from local, state and tribal governments. This project will be managed by the City of Tucson.
